

Landowner Beaver Control Blasting Services Agreement

Adopted by Council – July 14, 2021 Resolution No. 21.479

Purpose

In accordance with the Beaver Control Policy (Policy # 5A.003), residents of the Municipal District of Bonnyville (M.D.) who are registered landowners may apply for dam removal services. This program is in place to protect infrastructure from water movement related to beaver activity and to provide landowners with the option to blast problem dams with the assistance of trained municipal professionals.

Terms and Conditions

- (1) The landowner must be the registered owner/renter of the farmland within the M.D.
- (2) The landowner will pay a fee of \$100 per beaver dam, per visit for the removal of the requested blockages.
- (3) The M.D will provide beaver and/or beaver dam removal services on private property or public lands at no expense to the landowner only if the removal serves to protect municipal infrastructure (i.e roads, bridges, culverts, public land, etc.).
- (4) If a landowner requests that a beaver dam be removed on adjoining land that he/she does not own or control to resolve a flooding concern on his own land, municipal staff will only provide the service if written permission is obtained from the proprietor that the beaver dam or blockage is located. This will be done on a cost recovery basis at the discretion of the General Manager of Environmental and Protective Services or his/her designate.
- (5) The M.D may provide beaver and or beaver dam removal services on registered municipal drainage ditches to prevent the flooding of agricultural land subject to the authorization of the land's proprietor.
- (6) All costs and fees associated with beaver control services are subject to annual review by Council and are subject to change without notice.

Location(s) to be blasted:

Quarter _____ Section _____ Township _____ Range _____ W4M

Quarter _____ Section _____ Township _____ Range _____ W4M

Quarter _____ Section _____ Township _____ Range _____ W4M
